DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over 939 in view of US 7002642 B2, US 6816207 B2, US 6437915 B1, US 6246451 B1, US 6055013 A, US 5875055 A and US 5493427 A.

939 teaches a transflective panel comprising a reflective region and a transmissive region, the reflective region and the transmissive region being provided for each pixel [5,6], a diffuser process being performed on in a portion corresponding to the reflective region [23], a color filter having a colored layer formed in a portion corresponding to both the transmissive region and the reflective region [29] and a transparent layer formed on a portion corresponding to the reflective region, wherein the diffusion process is performed on in the portion corresponding to the reflective region, by using at least part of the transparent layer as a diffuser processed layer [23].

Per claims 9-12, 939 lack the parallax barrier and the switching cell. However, it was well known to place switching cells and parallax barriers between the display and the viewer to create a display capable of displaying either three-dimensional images or two-dimensional

Application/Control Number: 10/529,225

Art Unit: 2871

images. US 7002642 B2, US 6816207 B2, US 6437915 B1, US 6246451 B1, US 6055013 A, US 5875055 A and US 5493427 A evidence that it was well known.

Regarding the diffuser formed from a resin with particles on a layer opposite the reflecting electrode, although 939 fails to disclose this limitation, it was well known to form diffuse layers from resin and particles in order to achieve uniform light reflection in the reflective regions of the pixel. Nearly all of class 349 subclass 114 (transflector subclass) has a diffuser in the reflective region of the electrode for at least this reason. Accordingly, it would have been obvious to one of ordinary skill at the time of invention to combine the well known diffuser that includes particles in resins with the cell of 939.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

Applicant's arguments with respect to claims 9-20 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.

Application/Control Number: 10/529,225
